

Curiosity in the Classroom

<i>Descriptor</i>	<i>Lower Risk</i>	<i>Higher Risk</i>
<i>Movement</i>	Directed	Undirected
<i>Duration</i>	<15 Minutes	>15 Minutes
<i>Proximity</i>	> 6 Feet	< 6 Feet
<i>Group Size</i>	<Recommended Limit	>Recommended Limit
<i>Respiratory Output</i>	Normal	Increased
<i>Touch</i>	Low	High
<i>Congestion</i>	Low	High

Mitigation Strategies

- There will be no unnecessary movement around the classroom. If they are walking around it will be one student at a time in a directed path, to limit big groups of students.
- Students will be working in groups for over 15 min. Students will be in groups no more than 4 people. Students will be masked and no physical contact between students will be had.
- Students will not be in Contact with the presenter for more than 15 min.
- Students will be directed to keep their distance between themselves and other groups in the classroom during the building section of the activity. I am not sure if that is possible as you need multiple hands to help to build a spaghetti building. The students will be masked during this process to help mitigate the spread of Covid-19.
- Groups will be no more than 4
- Students will be talking through their ideas and collaborating with others in their groups to build a structure. Students will still be masked through the process of building.
- Students will only touch their supplies that are sanitized between every class rotation. The supplies will be passed out by one of our educators. The educators will be wearing gloves and a mask during this process.
- Students will only talk and interact with their groups. If students need to grab a supply only one person in their group will be able to get up at a time.
